I have a good work capacity with a problem-solving attitude enhanced with responsibility and respect. I always look for to establish and maintain good working relations with people of different national and cultural backgrounds.

Nowadays, I'm making my intership in Ireland, I get out of my country, where he had a career on the rise and comfort, to devote myself to new experiences and challenges. To enhance not only English but also to acquire independence in every aspect of life. I believe that everything in life is important for the maturation and that all areas of life are completely intertwined. Just as I believe that training is not only technically necessary to become a mature professional.
