

Dan O'Sullivan

Project Manager at Oracle

W: <http://www.worky.com/dan-osullivan>

An IT Project Manager with over 15 years experience in large multinational companies with a proven track record of successfully working with internal teams & external vendors meeting deadlines and ensuring projects were delivered on time and in budget. Over the last 6 years has been the main contact for the translation of Oracle University courseware, incorporating new ideas to save time and cost while always ensuring projects were delivered to the highest standards.

Dan O'Sullivan's Professional Experience

2007 - 2012 **Oracle - Project Manager**

for Legal documents, think.com, Oracle Academy & OCP's. (concurrent with above role)
Project Manager for highly confidential projects such as Oracle Legal documents & Oracle Certified Professional exams, both of these projects are high security projects.
Project Manager for Oracle educational projects think.com & Oracle Academy.

Key Skills Oracle, project manager

2006 - 2012 **Oracle - Project Manager**

for Oracle University courseware.
Main contact for the translation of all Oracle University courseware. These were Instructor led courses, Online, eLearning & Virtual courses. Translating the courses into 15 Languages, working with many different stakeholders which included 10 translation companies, 2 language specialists per language, SME's, Development & Publishing teams & Financial Department. Overall the global team was over 100 contacts. The budget was \$4 million per year.
Financed all the projects which included PO estimation, PO creation & would work with the Finance Dept to work out when Oracle would be invoiced. Monthly, Quarterly & Annual \$ spend reports would also be prepared for the Finance Dept & Directors.
All delivered courses were made available to Employees & Clients. These would be in a Online, eLearning or Virtual format to suit the customer. Along with delivering online courses, reporting of delivery dates & details of new or update courses were communicated online.
Introduced a new cost and time efficient translation process for Oracle University courseware, where translation kits would be centrally prepared and easily sent to the translation vendors.
In 2011 delivered & released over 300 courses on schedule & in budget. This included managing the project finances & making sure the translation companies invoiced on time & to the correct amount.
Work with translation vendors on a daily basis to solve any queries.
Experience of working with many Oracle products like Oracle Discoverer, iProcurement, PL/SQL, Oasis, Portal & Jdeveloper.

Key Skills finance, Oracle, PL/SQL, publishing, Reports, SQL

1999 - Present **Oracle EMEA - project manager**

Project Manager

Key Skills project manager

1997 - Present **Oracle - Project Manager**

1997 - 2006 **Oracle - Project Manager**

for Oracle Software & iHelp.
Worked in a team to translate Oracle Software & iHelp projects into 28 languages. This meant working with 25 global translation companies, 4 language specialists per language, internal

development & engineering teams.

Working to a budget of \$6 million per project, we would adjust & maintain the translation matrix making sure all modules were translated for all 28 languages.

Communicated & scheduled with internal engineers and external translation vendors to prepare, translate & deliver these projects on schedule.

Controlled the Finance of all these projects within a budget of over \$6 million

For such large projects we would constantly monitor, track & rate the translation companies performance ensuring the project is on schedule & to the highest translation standards. Post project reviews & complete vendor assessment reports would also be organized.

Experience of working with many Oracle products like Oracle Discoverer, iProcurement, PL/SQL, Oasis, Portal & Jdeveloper.

Key Skills engineering, engineers, finance, Oracle, Reports

1995 - 1997 **Elan Corporation - Assistant Project Manager**

for Elan Corporation.

Contributed significantly in a team based in Ireland & USA which introduced a computerized system for the various laboratories. Helped the technicians to improve efficiency in each lab.

Software & Hardware installations were the main priorities along with training all the laboratory technicians.
