

Dara McCreary

Graduate of Cell and Molecular Biology

W: <http://www.worky.com/dara-mccreary>

I have a passion for epigenetic, cell biology and development biology. I took any class which was related to either subject during College. The classes included numerous cell biology, development biology, epigenetic, bioinformatics, model organism's genetics and Genetic disease.

I have passion to learn this is why I decided to study science. Science is always changing; new ideas are developed every day. Since finishing college I have been working in a bar at night where I worked through college. During the day I have been reading scientific paper from various areas, trying to teach myself computer programming using "MIT openware" and I have just started to teach myself an introduction to German. I have been applying to various international institutes to gain work experience. While at UCD I was a member of the UCD Lacrosse team and the Irish Lacrosse National team.

Professional Experience

2005 - 2010 **Kilsaran Concrete Limited - office assistant/Batcherman**
Occasional work. Duties include shipping clerk, batcher man, shovel driver and general office duties.

2008 - 2010 **Woolshed Bar and Grill - Barman**
Barman in one of Dublin busiest sports bars. My duties varied from serving customers with drinks and food, cleaning and stock control.

2010 - 2010 **University College Dublin - Thesis work**

Education and Qualifications

2010 **Bachelor/Degree - cell and molecular biology**
University College Dublin
