## Garland Drake's Professional Experience

---

2004 - Present

### General Attendant

General Attendant

Working as a data centre professional. I control and manage the inbound / outbound of deliveries & shipments, ensuring equipment logged and distributed to data centre customers using Microsoft Access database. Control and administration of Asset Mgmt (including consumables). Supervise, arranged & coordinate all 3rd party contractors working on site, this includes supervision of customers working in secured areas of the data centre. Ensure Data Centre floor and general facility's appearance is kept to a very high standard of cleanliness and orderliness, by managing & arranging of cleaners, suppliers & service contracts for preventative maintenance.

Monitor and validate access into and out of the facility in conjunction with Front Security Desk.

Maintained all aspects of daily facility activities and records. Managed scheduling for service suppliers, building security & access, fire systems, HVAC, office moves & fit out of additional data centre within the building. Implemented monthly & weekly preventative maintenance schedules. Which has now been implemented across two tier 4 data centres.

Company Safety Representative

. Charged to conduct daily checklists covering Health & Safety, security, equipment, personnel. Manage and coordinate H&S training. Conduct monthly meetings, written company's emergency action plan.
