

Nick Glover

Structural Draughtsman Tekla Structures/AutoCad - Redcar,
United Kingdom

W: <http://www.worky.com/nick-glover>

I have been a Structural draughtsman for six years now, working with Tekla Structures and Autocad. I have mainly been working in the American market working for some big names like Hirschfeld Industries and Beck Steel. I have also worked on English projects from schools to oil rigs. I first started out at Consteel Technical Services where I served my time on two Tekla model award winning projects, I then moved onto BDS Vircon (Nottingham office) where I was employed to help out with the American work they were receiving into the office at that time. I am now working under my own company Glover Detailing Services contracting to a couple of local companies and looking to also spread my client base to abroad.

Nick Glover's Professional Experience

2012 - 2012 **FJ Booth Construction Ltd - Assistant Engineer**

While being at F J Booth Construction I was able to learn about the project management and coordinating with clients and customers to provide a smooth running project to be delivered on time.

My Main duties were as follows:

Document Control

Quality Control

Estimating

Key Skills construction, estimating, Project Management, Quality Control

2012 - Present **Glover Detailing Services - Managing Director/Structural Draughtsman**

I have 6 years experience as a structural draughtsman, working for the American and English market place providing draughtsman services for industry leading companies.

2011 - 2011 **BDS Vircon - Structural Draughtsman / I.T Manager**

I was employed at BDS to help out with the vast amount of American work they were receiving in the office due to the lack in the English Market. My duties included the following:

Using Tekla Structures and AutoCad

Creating drawings for fabrication

Creating GA drawings

Model Changes to suit approval returns

General I.T tasks.

Key Skills AutoCAD, fabrication, I.T, Tekla Structures

2006 - 2011 **Consteel Technical Services - Draughtsman / Technician**

My Duties includes:

Creating GA drawings in Tekla Structures.

Editing drawings to AISC standards and the customers requirements.

Reporting to the squad leader.

Document Control.

Key Skills AutoCAD, Detailer, Draughtsman, Tekla Structures
