

Paulo Mateus

Instrument Pipefitter

W: <http://www.worky.com/paulo-mateus>

Portuguese instrument pipefitter with 20 years of experience working pipe, initially in construction and in the last years in chemical industries, power plants, oil and gas refinery

Work experience outside of Portugal including, Spain, Holland and France

Paulo Mateus's Professional Experience

2008 - Present

Quadromor - Instrument Pipefitter

Reading technical drawing, isometric, P&IDS e Hook Up

I am experienced in a wide range of pressure testing and flushing

Manufacturer of Instrument panels and tubing for gas turbines

Tubing connection in container, cabinet and panels for sampling

Manufacture of supports, application of instruments according to the documentation

Swagelok and Parker instrumentation products service manuals and user guides

I have worked with various materials, pipes, sizes and systems. I have worked on a variety of pipe materials including copper, stainless steel, carbon steel, duplex tubing, etc.

Ability to perform instrumentation commissioning activities.

Basic computer literacy and experience of electrical, mechanical or engineering work

Some reference works

Combined-cycle gas turbine power stations

2007 - Lares - Portugal 862 MW General Electric

2008 - Besos - Barcelona 400 MW General Electric

2009 - Pego - Portugal 830 MW Siemens

2010 - Moerdijk 2 Holland 426 MW General Electric.

Thermosolar plants

2009 - Montijo - Spain 50 MW

2012 - La Africana - Cordoba - Spain 50 MW

2011- Galp Energia Sines Portugal - Conversion project of the oil refining complex

Key Skills

Electrical, engineering, Mechanical

1987 - 2008

Paulo Mateus Limitada - Pipefitter / Plumber Self- employed / Manager

Areas of expertise

Domestic and industrial tubing systems

Manufacture of supports, application of instruments according to the documentation

Roads for electric cables, in metallic net and pipe of steel in

Instrumentation pipefitter, tubing for processes in pressure instruments, flow and temperature.

Welding

Displaced in Spain working with Isastur Engineering as Team Leader in the assembly of solar power plants, and industrial maintenance for nine months in 2008

Key Skills

engineering, team leader, welding

Paulo Mateus's Education and Qualifications
