Richard Page's Professional Experience

2012 - Present

Randridge Int. / Mitsubishi / NUON - IPCS / QC Operator

I am currently working as IPCS / QC operator NUON's new Power Station in Eemshaven, North Holland, the work includes data capture, report writing and liaising with the client Mitsubishi and delivering progress reports on daily E&I and QAQC activities.

Key Skills data, Reports

2011 - 2012

Randridge Int - Electrical Field QA Engineer

I worked as a Electrical Field Engineer on Shell's Integrated Hydro-desulphurization plant in Pernis, Rotterdam. During my time here my role changed quite a lot my duties during this period included, work preparation for turn over systems, co-ordination of the Test and QAQC teams, making sure ITP are being implemented and followed for various instrumentation and LV, MV and HV motors. I delivered daily reports on progress and forecasted completion dated of Turn Over Systems for the Client, Shell, and main contractor, CB&I. I also implemented ISO 9000 as part of the companies directive to ensure quality is being provided at all levels.

Key Skills Electrical, Engineer, Field Engineer, Reports

2011 - 2011

Tekken Security Solutions - Door Supervisor

Participated in a team working together in large venues, dealing with a large and diverse sector of the public. I regularly had to conduct risk assessments of situations and of areas, notifying management or dealing directly with hazards myself

2011 - 2011

Randridge International - Junior Electrical Engineer

Coordination of daily workforce, monitoring turn over systems, daily progress reporting and quality control. Liaising with the client accounting for weekly progress and forecasting completion dates.

Key Skills Progress Reporting

2007 - 2011

Synergy Security Solutions - Head of security

My duties included acting as a first point of contact for customers. Decision making was a main duty with risk analysis' having to be made regularly. Report writing daily and hosting meeting with the local Gardai.

Key Skills Acting

2007 - 2007

Reliance Gear Corporation - Quality Controller

I monitored the overall progress of work daily, examining random batches of end products, measuring and referring to client specified ranges of tolerance for products destined for the aerospace industry or high precision vacuum components.

2006 - 2006

Reliance Precision Ltd - Quality Controller

Duties consisted of completing general tasks in the stores and also on the factory workshop. In the stores my duties were inspecting end of line products and assembling small components set for the aerospace industry.
