## Rope Access at Rope Rats

W: <http://www.worky.com/robert-adams2>

. I have a proven track record in team leading, man management and communicating with individuals through to groups in conducting meetings that achieve results. As an individual I am very confident that I possess practical hands-on experience having been involved in heavy construction for the last twenty years and have recent offshore experience. My skill base although not limited to includes, Rigging and Lifting, Banksman/Slinger Confined Space, Rope Access, Tension and side Netting, Suspended Deck Rigging, Drops Inspection, Fabric Maintenance, Blasting / Painting, Fireproofing and Geotechnical work including rock stabilization and industrial cleaning. I have experience in writing permit to works and conducting toolbox talks and have years of experience in project planning and managing. I demonstrate a strong ability to analyse problems and seek solutions. My personal life also revolves round mountaineering and climbing which desires a cool head in stressful situations and difficult weather conditions. I have extensive history of working at height with the use of Fall Arrest systems. I am a strong believer in following proper protocol, thinking strategically and being methodical in planning and performing tasks and have an eagerness and capacity to learn new skills.

### Robert Adams's Professional Experience

---

2012 - 2012 **Axess Norway Offshore - Rope Tech drops inspector**

Rope access drops Inspection of Transocean Searcher, carrying out equipment manifest checks and loler of working gear , writing permit to works, tool box talks, securing work site, rigging of drop points, drops inspection of derrick main structure and wind wall, fabric maintenance of wind wall and derrick, inspection of port and starboard flare boom supporting ndt inspector and recording findings,

---
