Prezi Work Shop

TITLE: USING PREZI AS A TEACHING AND LEARNING TOOL

Prezi is a web-based presentation application and storytelling tool that uses a single canvas instead of traditional slides. Text, images, videos and other presentation objects are placed on the infinite canvas and grouped together in frames. The canvas allows users to create non-linear presentations, where users can zoom in and out of a visual map

Key Skills Learning and teaching tools, Presentations, prezi.com, Technology in the Classroom
